

BLOXAM BURNETT & OLLIVER

Senior Structural Engineer

- Hands on technical design and delivery role
- Join a talented Structural Team
- Career and leadership opportunities

If you are a Senior Structural Engineer with a passion for bridges and heavy structures, then look no further! BBO's structural engineering involvement is dominated by bridges and wind farm foundations, but also includes industrial structures and conventional buildings.

Our bridge team are working on and have delivered some great bridge projects, including the SH1 Atiamuri Bridge and a Hamilton bridge currently under construction across the mighty Waikato River; several other bridges associated with the Peacocke Strategic Transport project; and a range of other complex and interesting projects. If you're looking for a non-hierarchical environment where people can be themselves, grounded, resourceful, collaborate and supportive, plus have a genuine desire to do right by the clients they serve, then this could be the right place for you.

BBO is multi-discipline consulting firm of engineers, planners and surveyors delivering diverse infrastructure projects from highways and bridges to land and site development and council infrastructure. We're big enough and have the multi-disciplinary expertise to lead large projects to completion, but also small enough to be personable and approachable.

With an eye on the future BBO is looking for a technically-sound structural engineer with an interest in assuming leadership responsibilities to join the team now! Does this sound like you?

The Challenge

- Undertake a senior role withing the structural team, including contribution to technical leadership.
- Investigate, prepare, or oversee design briefs as appropriate for different projects.
- Deliver innovative, robust, technically competent designs and contract documentation.
- Mentor and guide others and provide technical direction and input.
- Bring project management rigour to those projects you're managing.
- Represent the business to clients, provide excellent client service, promote technical capabilities and services, and get involved in bids and proposals.
- Be part of a close-knit team.

Your Skills

- CPEng or eligible to apply for professional qualification.
- 10 years minimum relevant experience working on bridges and/or similar projects.
- Practical knowledge of design codes and standards, legislation, and construction practices in New Zealand.
- Proven ability to take ownership and drive best technical and project outcomes.
- Excellent communication skills and have genuine interest in sharing your knowledge and mentoring junior engineers.

All applications and employment enquiries are forwarded to our outsourced recruitment provider, Peak Recruitment, to be reviewed on behalf of BBO.

For a further information about this role and to apply, visit www.peakrecruitment.co.nz or jobs@peakrecruitment.co.nz, or contact Fiona Clarke (in confidence) on 027 688 8837.
