

# Graduate & Intermediate Traffic Engineers

- Outcome driven organisation who reward success
- Strong team culture – friendly, grounded & collaborative
- Enjoy challenging, interesting work

If you're looking for an enjoyable team environment where people are grounded and resourceful, collaborate and support each other, plus have a genuine desire to do right by the clients they serve, then Bloxam, Burnett and Olliver (BBO) could be the right place for you.

BBO is multi-discipline consulting firm with offices in Hamilton and Tauranga. We collaborate with councils and government agencies, property developers and other consultants to provide services in engineering (infrastructure, site observation, structures, water resources, traffic and transportation), planning and land development. Despite our relatively small size, we compete with major national and international consultants for significant projects and have developed a strong reputation for delivery. This comes down to the expertise of our team, plus the strength of our relationships and collaboration.

BBO is on the look-out for Graduate & Intermediate level Traffic Engineers to join its Hamilton office.

## The Challenge

- Carry out traffic modelling, analysis and reporting, contributing to traffic and safety investigations, road corridor and intersection design, route and other transportation studies.
- Work closely with the planning and design teams and participate in multi-disciplinary studies.
- Understand the client's problem and develop innovative, robust, technically competent solutions with sound documentation.
- Work as a team member ensuring delivery meets the business and client expectations.
- Represent the business to clients, provide good client service, promote technical capabilities and services, and assist on proposals.

## Your Skills

- Hold a BE Civil or equivalent and preferably have CPEng or be working towards it.
- Minimum of 1 to 5 years relevant professional experience, ideally in a consulting environment.
- Ideally have used SIDRA, LinSig and possibly VISSIM or a similar micro simulation software.
- Excellent communication skills.
- Innovative problem solver, able to work at both a big picture and detailed level.

If you're looking for challenging work and a friendly environment, and you take pride in your work and like being able to get on with it and deliver, then we want to hear from you.

All applications and employment enquiries are forwarded to our outsourced recruitment provider, Peak Recruitment, to be reviewed on behalf of BBO.
